Description

Sprint planning

Date of the meeting: 30/07/2015

Sprint objective: Third release of MARTe with support for MARTe objects and small refactoring of static const objects and static member variables.

Backlog items:[#189](#), [#188](#), [#187](#), [#186](#), [#185](#), [#184](#), [#183](#), [#182#181](#), [#179](#), [#177](#), [#176](#), [#169](#), [#168](#)

Sprint review

Almost all the user-stories were successfully completed. Some issues remain to be addressed (see Technical debt below).

Sprint retrospective

- Things that the team should start doing
 - Simplify and improve the quality of the API documentation of the tests;
 - Improve the readability (even more obvious variable names) of the testing source-code;
 - Have the quality review of the tests focus more on the quality of the code rather than on the documentation;
 - Avoid branching in the tests source code: if a test requires "if..then" or "switch" probably it needs refactoring.
- Things that the team should stop doing
 - Avoid having many user-stories going in parallel and tackling many source-files.
- Things that the team should continue doing

Technical debt

Non-completed user-stories: [#169](#), [#182](#), [#183](#), [#188](#), [#189](#)

[#169](#) and [#182](#) will be completed in the next sprint; [#183](#), [#188](#) and [#189](#) will be moved to the backlog for future development.

Backlog review (reestimation, reprioritization, weighting)

The sprint was successful, with the exception of [#169](#) and [#182](#) which miss only formal reviewing.
