**Description**

Define the base infrastructure for object introspection.
This would satisfy requirements:

- MARTe-EX-F-4.1.1: The framework shall promote a unique data-driven mechanism for the configuration of its objects.
- MARTe-EX-F-4.2.2: The framework objects shall be agnostic of the external configuration language format.
- MARTe-EX-F-4.2.3: The framework shall support multiple configuration languages.
- MARTe-EX-D-4.3.1: The framework objects shall not parse any raw configuration data.

# Source code files modified

# Architecture & design review

**Date of the review:** 31/07/2015

**Person who did the review:** Andre' Neto

**Version of architecture & design document:** N/A. As per the original MARTe implementation, this is a support function and does not require formal design in UML.

**Result of review:** N/A

**List of non-conformities:** N/A

# Code and documentation review
